SUMMARY

IT graduate with a Bachelor of Information Technology from Federation University Australia and a Google IT Support Professional Certificate, with a genuinely broad and versatile skill set spanning full-stack software development, DevOps/cloud infrastructure, IT support, and technical documentation. I lead with evidence, not just claims — I've independently designed, built, and deployed three live production systems over the past year, each demonstrating a different strength: a full-stack booking platform delivered as Project Manager for a real client, a complete DevOps pipeline with cloud monitoring, and a help-desk ticketing system with production-grade testing and documentation. I'm a fast, self-directed learner, a clear communicator with both technical and non-technical audiences, and genuinely comfortable adapting across IT support, software engineering, and customer-facing roles. Open to full-time, contract, or temp opportunities across the IT/ICT sector in Adelaide.

TECHNICAL SKILLS

IT Support & Help Desk: Windows 10/11, macOS, Linux, remote desktop tools, ticketing systems, hardware/software troubleshooting, ITIL basics	Networking: TCP/IP, DNS, DHCP, VPN, firewalls, subnetting, network diagnostics
Cloud & Identity: Active Directory, Azure AD / Entra ID, Microsoft 365 admin, Exchange Online, Intune, MFA, RBAC	Cyber Security: NIST CSF 2.0, ASD Essential Eight, least-privilege access, vulnerability awareness
DevOps & Infrastructure: Docker, Kubernetes, Helm, GitHub Actions CI/CD, Terraform, Prometheus, Grafana, AWS, Render	Development: Python (FastAPI), Node.js, JavaScript, React, SQL (PostgreSQL/MySQL/SQLite), MongoDB, REST APIs, Git
Technical Writing: User guides, API documentation (OpenAPI/Swagger), README/setup documentation, knowledge base articles	Tools: PowerShell, Bash, Microsoft Office, CRM/helpdesk software workflow logic

CORE COMPETENCIES

Stakeholder Communication

Project Ownership

Agile / Scrum Delivery

Problem Solving

Customer Service

Adaptability

Attention to Detail

Time Management

Team Leadership

Fast Learner

PROJECTS

Call-a-Technician — Technician Dispatch & Booking Platform

University Capstone | 2024–2025

Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Stack: Node.js, Express, MongoDB, JWT, React, npm workspaces · Role: **Project Manager & Full-Stack Developer**

- As **Project Manager**, led a 5-person team from initial client requirements through to a live production launch — ran weekly standups, owned the sprint backlog in Agile/Scrum, and was the primary point of contact for a real external client throughout delivery.
- Designed and built a Node.js/Express/MongoDB REST API with JWT authentication and role-based access control, powering an 8-stage job workflow with a full audit trail.
- Built the public booking site and an internal operations dashboard end-to-end, including a customer request form, automated email confirmation, and reCAPTCHA spam protection.
- Delivered a real product still in production use by a real business today — direct evidence of end-to-end ownership from requirements to production.

SkyOps — End-to-End DevOps Platform

Personal Project | 2025

Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops · Stack: Docker, Kubernetes, Helm, GitHub Actions, Prometheus, Grafana, FastAPI, PostgreSQL

- Designed and shipped a complete 6-phase DevOps pipeline from scratch: containerisation → orchestration → packaging → CI/CD → monitoring → live production deployment.
- Built a GitHub Actions CI/CD pipeline that lints, tests, builds, and deploys automatically on every commit, with zero manual steps — true infrastructure-as-code from commit to production.

- Built a live monitoring dashboard and a Grafana dashboard (request rate, P95 latency, error rate) for proactive operational visibility.

TicketDesk — Help-Desk Ticketing API

Personal Project | 2025

Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk · Stack: Python, FastAPI, PostgreSQL, Docker, Terraform (AWS EC2)

- Designed and shipped a production help-desk REST API covering the full ticket lifecycle, with auto-generated Swagger/OpenAPI documentation.
- Wrote a 23-test automated suite and Terraform IaC to provision AWS infrastructure — repeatable, version-controlled, with zero manual server setup.
- Built a GitHub Actions CI pipeline running the full test suite on every push, catching regressions before production.

WORK EXPERIENCE

Commercial Cleaner

Aug 2023 – Present

VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys; introduced standardised checklists that improved site quality scores by 25%.

Warehouse Operator

Dec 2023 – Jan 2025

Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day; identified and implemented a process improvement that cut picking time by 20%.
- Zero lost-time incidents across the full tenure — maintained WHS compliance at every inspection.

EDUCATION

Bachelor of Information Technology

Federation University Australia

Federation University Australia · Adelaide, SA

- Relevant units: Python, Java, Databases, Networking, Cybersecurity, Software Engineering, Systems Analysis.

CERTIFICATIONS

Google IT Support Professional Certificate

Coursera / Google · Nov 2025 – Jan 2026

Microsoft Azure AI Essentials

LinkedIn Learning · Feb 2025 – May 2025

Career Essentials in Cybersecurity

Microsoft · Mar 2025 – May 2025

Generative AI Automation Specialization

Vanderbilt University · Apr 2025 – May 2025
