SUMMARY

IT graduate with a Bachelor of Information Technology and a strong, demonstrated habit of producing clear, accurate technical documentation — not as an afterthought, but as a core part of how I build software. Across every project I've shipped, I've written user-facing documentation, API references, and setup guides that genuinely needed to work for someone other than me. I have high computer literacy, a logical, detail-oriented approach to structuring information, and genuine empathy for the reader — I know what it's like to return to my own documentation months later and need it to actually answer the question I have. I'm comfortable digesting complex technical concepts (from REST APIs to cloud infrastructure to DevOps pipelines) and distilling them into concise, accurate, easy-to-follow material, and I'm a fast learner with new technical domains and tools.

TECHNICAL SKILLS

Technical Writing: User guides, API documentation, README/setup documentation, troubleshooting guides, knowledge base articles

Version Control & Collaboration: Git, GitHub, collaborative documentation review and revision

Content Structure: Information architecture, logical topic/section structuring, audience-appropriate language

Documentation Tools & Formats: Markdown, auto-generated OpenAPI/Swagger docs, structured technical specifications

Software & Systems Literacy: REST APIs, cloud infrastructure, databases (SQL), DevOps pipelines, networking fundamentals

Software Development: Python, JavaScript, Node.js, working directly with engineering teams on product features

CORE COMPETENCIES

Clear Written Communication

Attention to Detail

Logical Thinking

Reader Empathy

Fast Learner

Cross-Team Collaboration

Continuous Improvement

Self-Directed

PROJECTS — DOCUMENTATION IN PRACTICE

Call-a-Technician — Technician Dispatch & Booking Platform University Capstone | 2024–2025
Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: **Project Manager & Full-Stack Developer**

- As **Project Manager**, led a 5-person team from initial client requirements through to a live production launch — wrote and maintained the project documentation that kept both the development team and a real external client aligned on scope and decisions throughout delivery.
- Digested technical decisions made by the development team and translated them into documentation a non-technical client could understand and act on — direct practice with the "subject matter expert to end user" translation this role requires.
- Wrote a comprehensive README covering setup, architecture, and usage for the full monorepo, structured to onboard a new developer with no prior context.
- Delivered a real product still in production use by a real business today — proof that the documentation behind it was clear enough to actually work in practice.

SkyOps — End-to-End DevOps Platform Personal Project | 2025
Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops

- Wrote a comprehensive README distilling a genuinely complex technical pipeline (Docker, Kubernetes, Helm, CI/CD, monitoring) into a structured, step-by-step guide covering quick starts, architecture diagrams, and configuration tables — exactly the kind of "complex concept made accessible" writing this role calls for.
- Maintained troubleshooting and operational documentation throughout, written so anyone could pick up support of the system from the notes alone.

TicketDesk — Help-Desk Ticketing API Personal Project | 2025
Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk

- Built auto-generated, interactive API documentation (Swagger/OpenAPI) covering every endpoint — practical experience producing reference material that stays accurate as the underlying product changes, a key concern for any software documentation team.

WORK EXPERIENCE

Commercial Cleaner

Aug 2023 – Present

VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys; introduced standardised checklists that improved site quality scores by 25% — a process-documentation mindset applied outside of software.

Warehouse Operator

Dec 2023 – Jan 2025

Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day, requiring sustained attention to detail in a fast-paced environment.

EDUCATION

Bachelor of Information Technology

Federation University Australia

Federation University Australia · Adelaide, SA

- Relevant units: Software Engineering, Systems Analysis, Databases, Networking, Cybersecurity.

CERTIFICATIONS

Google IT Support Professional Certificate

Coursera / Google · Nov 2025 – Jan 2026

Microsoft Azure AI Essentials

LinkedIn Learning · Feb 2025 – May 2025

Career Essentials in Cybersecurity

Microsoft · Mar 2025 – May 2025

Generative AI Automation Specialization

Vanderbilt University · Apr 2025 – May 2025
