Dear Daniel,

I'm writing to apply for the ICT Service Desk Officer role at Mount Barker District Council. The opportunity to support Council staff across a broad range of systems, contribute to cybersecurity initiatives, and help people confidently navigate modern digital environments is exactly the kind of meaningful, community-facing IT role I'm looking for.

I hold a Bachelor of Information Technology and a Google IT Support Professional Certificate, with practical knowledge of Microsoft 365, Windows, Active Directory, Azure/Entra ID, Intune, SharePoint, and Teams. I've also studied cyber security frameworks including NIST CSF 2.0 and the ASD Essential Eight, and take security-conscious IT practices seriously as a genuine professional standard, not just a box to tick.

I want to be upfront: I don't yet have paid experience at a formal service desk. What I can point to instead is a help-desk ticketing platform I built and now personally operate — **TicketDesk** (ticketdesk-app.onrender.com) — which covers the full first-level support lifecycle: log, prioritise, assign, resolve, and document, with accurate records maintained throughout. As Project Manager on a university capstone, I also led a 5-person team delivering **Call-a-Technician** (callatechnician.com.au), a live platform now used in production by a real business. I built and maintained the client relationship, kept documentation current, and resolved issues autonomously — the same communication, collaboration, and accountability this role asks for.

I'm a genuine people person who enjoys helping others navigate technology, I stay calm and solutions-focused under pressure, and I'm genuinely passionate about contributing to a well-run organisation that serves its community. I'd work hard to earn the trust of Council staff and deliver the outstanding customer experience this role is built around.

Thank you for considering my application — I'd welcome the opportunity to discuss this role with you.

Kind regards,

Priyanshu
