SUMMARY

IT professional with a Bachelor of IT from Federation University Australia and a Google IT Support Professional Certificate, with hands-on experience across Microsoft 365 administration, Azure/Entra ID, Active Directory, Windows environments, and networking fundamentals. I led a 5-person university capstone team as Project Manager to deliver a live service-booking platform for a real client — directly building the client communication, requirements-gathering, and stakeholder-management skills an MSP environment demands. I also designed, deployed, and now maintain three production systems with full technical documentation, monitoring, and ticketing-style workflow logic, giving me practical experience with the troubleshooting, escalation, and systems administration this role requires. Calm under pressure, solutions-focused, and comfortable owning an issue end-to-end for a client.

TECHNICAL SKILLS

Microsoft Ecosystem: Microsoft 365 administration, Azure AD / Entra ID, Exchange Online, Intune, MFA, RBAC, conditional access	Systems Administration: Windows 10/11, Windows Server fundamentals, macOS, Linux (Ubuntu), Active Directory, endpoint management
Networking: TCP/IP, DNS, DHCP, VPN, firewalls, subnetting, Cisco fundamentals, network diagnostics	IT Support & Service Delivery: Ticketing systems (ServiceNow), hardware/software troubleshooting, ITIL basics, remote desktop tools, device setup and user onboarding
Cloud & DevOps: AWS (EC2), Docker, Kubernetes, Terraform, GitHub Actions CI/CD, Prometheus, Grafana	Documentation & Tools: Technical documentation, system change logs, Git, PowerShell, Bash, REST APIs, SQL

CORE COMPETENCIES

Client & Stakeholder Communication

Calm Under Pressure

Customer Service Mindset

Problem Solving

Follow-Through & Ownership

Documentation & Reporting

Agile / Scrum Delivery

Time Management

PROJECTS

Call-a-Technician — Technician Dispatch & Booking Platform University Capstone | 2024–2025

Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: Project Manager & Full-Stack Developer

- Led a 5-person team as Project Manager, acting as the main point of contact between the development team and a real external client — gathering requirements, managing expectations, and reporting progress throughout delivery.
- Built an 8-stage job workflow (Open → Assigned → Accepted → En Route → On Site → In Progress → Completed → Closed) with a full audit trail — directly analogous to a service-desk ticket lifecycle.
- Built the public booking site and an internal operations dashboard for staff to review requests, assign technicians, and track live job status — practical experience designing a system around real end-user and client needs.
- Maintained ongoing documentation of system changes and decisions across the project lifecycle to keep the team and client aligned.

TicketDesk — Help-Desk Ticketing Platform Personal Project | 2025

Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk

- Designed and built a help-desk ticketing system covering the full ticket lifecycle — create, update, filter by status/priority/assignee, close — with auto-generated documentation for every endpoint.
- Wrote a 23-test automated suite to verify ticket logic stays reliable as the system changes, plus a monitoring stack (Prometheus + Grafana) tracking system health and error rates in real time — the same operational mindset needed to support live client environments.
- Provisioned and documented the supporting cloud infrastructure (AWS EC2, Terraform) end-to-end, including a fully scripted, repeatable setup process.

SkyOps — End-to-End DevOps & Monitoring Platform Personal Project | 2025

- Built a background health-check service monitoring registered endpoints every 60 seconds, feeding a live dashboard showing uptime history and incident status — the same proactive-monitoring approach used to catch client issues before they escalate.
- Built a complete CI/CD and infrastructure pipeline (Docker, Kubernetes, Terraform, GitHub Actions) with full technical documentation for setup, deployment, and troubleshooting.

WORK EXPERIENCE

Warehouse Operator

Dec 2023 – Jan 2025

Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day in a high-volume environment requiring sustained attention to detail under time pressure.
- Ran cycle counts and reconciliation that brought stock variances down by 30% over two quarters through structured tracking and documentation.

Commercial Cleaner

Aug 2023 – Present

VIP Cleaning Services · Adelaide, SA

- Consistently scored 95% in client quality surveys, working directly with clients to understand and meet their expectations — improved site scores by 25% after introducing standardised checklists.
- Built trust with recurring clients through reliable, professional service delivery — directly transferable to client-facing IT support.

EDUCATION

Bachelor of Information Technology

Federation University Australia

Federation University Australia · Adelaide, SA

- Relevant units: Networking, Cybersecurity, Databases, Systems Analysis, Software Engineering, Python, Java.
- Applied Agile/Scrum across all team projects; capstone delivered a live full-stack platform for a real client.
