Dear Hiring Manager,

I'm writing to apply for the Helpdesk Junior Technician / Level 1 role at ProgressIT. I want to address one thing upfront: I'm currently based in Adelaide, not Perth. I'm genuinely open to relocating for the right opportunity, and this role — training-focused, with real exposure to enterprise-scale virtualised infrastructure and a team that keeps technicians involved through to ticket resolution — is exactly the kind of opportunity worth moving for.

I hold a Bachelor of Information Technology and a Google IT Support Professional Certificate, with a solid understanding of Windows desktop support, Active Directory, DNS, DHCP, Group Policy, and Microsoft 365 technologies. I also have practical networking knowledge across switching, routing, VLANs, WLAN, WAN, and VPNs from my degree. Beyond study, I've spent the past year independently building and operating three live systems, including **TicketDesk** (ticketdesk-app.onrender.com), a help-desk platform I designed around the exact kind of structured, logical troubleshooting process this role describes, and **SkyOps**, where I work with containerised, virtualised infrastructure and monitor live systems independently.

I genuinely have a passion for IT — it's not just a job title to me, it's something I spend my own time building and learning outside of any requirement to. I'm a calm, methodical troubleshooter who follows a logical process of elimination rather than guessing, and I communicate clearly and pleasantly, which I've built through two years of direct client-facing work in commercial cleaning, where I consistently scored 95% in client quality surveys.

I'm comfortable working unsupervised, punctual, detail-focused, and a genuine team player. I'm happy to provide a National Police Clearance if successful, and I'd welcome the opportunity to discuss relocating to Perth to join your team.

Thank you for considering my application.

Kind regards,

Priyanshu
