Dear Hiring Manager,

I'm applying for the Enterprise Technology Graduate Program at Deloitte Adelaide, with stream preferences for Tech Strategy & Transformation and Tech Managed Services. I'm drawn to Deloitte specifically because the work is described as real, client-facing, and connected to meaningful business outcomes — not shielded graduate work — and that's the environment where I know I'd grow fastest.

I'm a recent IT graduate from Federation University Australia, and what I think differentiates me is that I already understand how technology decisions connect to business outcomes — not from theory, but from experience. As Project Manager on a university capstone, I led a 5-person team to deliver **Call-a-Technician** (callatechnician.com.au), a live platform now used in production by a real business. I gathered and analysed requirements directly from the client, translated them into a technical solution, managed stakeholder relationships throughout delivery, and designed the system's workflows and business processes around how the client actually operated. That work — understanding business needs and turning them into technology outcomes — is exactly what Deloitte's Tech Strategy & Transformation stream does at scale.

For my Tech Managed Services preference, I've built and personally operate **TicketDesk** (ticketdesk-app.onrender.com), a production service management platform covering the full support lifecycle — ticket logging, prioritisation, assignment, resolution, and documentation — which directly models the kind of managed service workflow your HR, Payroll and Workforce Management support teams work within daily. I understand what good incident management looks like from the inside, not just the theory.

I also hold Microsoft Azure AI Essentials and a Generative AI Automation Specialization (Vanderbilt University), and I've built a complete cloud platform with CI/CD, Kubernetes, and live monitoring — so the technology side of enterprise transformation is something I can genuinely contribute to from day one, not catch up on.

I'm collaborative, curious, and aligned with Deloitte's values around inclusive culture and diverse thinking. I'd love the chance to work alongside experienced professionals on real transformation work and build a meaningful career here.

Kind regards,

Priyanshu
