SUMMARY

Curious, hands-on graduate with a Bachelor of Information Technology, genuinely the person people call when something technical stops working. I don't have direct CAD/CAM or CNC experience, but I've spent the past year proving I can pick up complex new software fast — I independently taught myself to design, build, and launch three live software products from scratch, with zero formal training, simply because I wanted to understand how they worked. As Project Manager on a university capstone, I led a 5-person team delivering a live platform for a real client, including walking through their needs, customising the solution to fit, and training stakeholders on how to use it — exactly the kind of customer-facing technical work this role is built around. I genuinely enjoy explaining technical things in a way people actually understand, and I'm excited about the idea of visiting customer sites and travelling for the role rather than staying behind a desk.

CORE STRENGTHS

- Genuinely Curious
- Fast Learner
- Problem Solving
- Customer Training & Communication
- Hands-On / Tinkerer Mindset
- Willing to Travel
- Relationship Building
- Adaptability

PROJECTS — LEARNING NEW SOFTWARE FAST, IN PRACTICE

Call-a-Technician — Technician Dispatch & Booking Platform University Capstone | 2024–2025
Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: **Project Manager & Full-Stack Developer**

- **As Project Manager**, led a 5-person team from initial client requirements through to a live production launch — walked through the client's actual workflow and needs, then customised the solution to fit, instead of forcing a generic build onto them.
- Trained stakeholders on how the final platform worked once delivered, and communicated directly and clearly throughout the project — the same customer training and relationship-building this role is centred on.
- Delivered a real product still in production use by a real business today — proof I can take a customer's actual needs and turn them into a working solution they're happy with.

TicketDesk — Help-Desk Ticketing Platform Personal Project | 2025
Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk

- Taught myself an entirely new tech stack to build this from scratch, on my own initiative — direct proof I can get up to speed on unfamiliar software quickly, the same skill needed to learn SeKon and StonePro.

SkyOps — Live Monitoring Platform Personal Project | 2025
Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops

- Built and personally operate a live system end-to-end — the same hands-on, figure-it-out-myself curiosity I'd bring to learning specialist CAD/CAM software and troubleshooting it for customers.

WORK EXPERIENCE

Commercial Cleaner Aug 2023 – Present
VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys through clear communication and reliable, on-site service.

Warehouse Operator Dec 2023 – Jan 2025
Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day, working hands-on with equipment and machinery in a fast-paced, high-volume environment.
- Identified and implemented a process improvement that cut picking time by 20% — practical, hands-on problem solving.

EDUCATION

Bachelor of Information Technology Federation University Australia

Federation University Australia · Adelaide, SA
