Dear Hiring Manager,

I'm writing to apply for the Service Desk Analyst role at ElectraNet. The combination of meaningful infrastructure work, supporting South Australia's clean energy transition, and a clear focus on customer outcomes is exactly the kind of role I want to build a career around.

I want to be upfront: I don't yet have paid experience in a first/second line service desk function. What I can offer instead is a body of self-directed, hands-on work that demonstrates I can already do this job well. I built and now personally operate **TicketDesk** (ticketdesk-app.onrender.com), a help-desk platform modelling the exact incident and service request lifecycle this role works in daily — logging, prioritising, resolving, and documenting through to closure, with a 23-test automated suite to manage change safely. I also built **SkyOps**, where I monitor a live system proactively and respond to issues before they escalate, the same continuous-improvement mindset your role description emphasises.

As Project Manager on a university capstone, I led a 5-person team to deliver Call-a-Technician, a live booking platform now used in production by a real business — I built and maintained strong working relationships with a real client and across the team, kept stakeholders informed throughout, and took full ownership of outcomes rather than just my individual tasks. I hold a Bachelor of Information Technology, exceeding the diploma-level qualification for this role, along with a Google IT Support Professional Certificate and sound knowledge of Microsoft 365, Windows, and basic networking.

I'm analytical, customer-focused, and genuinely enjoy figuring out the root cause of a problem rather than just closing a ticket. I'm flexible with working hours and keen to bring real ownership and a can-do attitude to ElectraNet's Service Desk.

Thank you for considering my application — I'd welcome the opportunity to discuss how I could contribute to your team.

Kind regards,

Priyanshu
