SUMMARY

IT professional with a Bachelor of Information Technology and a Google IT Support Professional Certificate. I don't yet have two years of paid IT customer service, but I bring genuine, practical experience that maps directly onto this role: I led a 5-person capstone team as Project Manager to deliver Call-a-Technician, a live booking platform now used in production by a real business — direct experience triaging requests, coordinating people, and keeping a service relationship on track. I've also independently built and now personally operate a help-desk ticketing platform and a live infrastructure monitoring system, giving me real, hands-on practice with remote troubleshooting, escalation, documentation, and basic scripting in Python and JavaScript. I'm comfortable with Linux environments, communicate technical issues in plain language, and stay composed under pressure during urgent issues.

TECHNICAL SKILLS

Troubleshooting: Remote diagnosis, hardware/software fault-finding, logical process of elimination, escalation handling

Scripting & Development: Python, JavaScript, Bash, PowerShell, REST APIs

Microsoft 365 & Tools: Microsoft 365, Exchange Online, Teams, remote support tooling

Operating Systems: Linux (Ubuntu), Windows 10/11, macOS, basic system administration

Service & Documentation: Ticketing/service record workflows, triage by urgency/impact/category, accurate job documentation, continuous improvement tracking

Deployment & Monitoring: Software deployments, version-controlled configuration (Terraform, Docker), live monitoring (Prometheus, Grafana)

CORE COMPETENCIES

Clear Communication

Composure Under Pressure

Customer Service

Documentation Discipline

Cross-Team Collaboration

Prioritisation & Follow-Up

Problem Solving

Fast Learner

PROJECTS

Call-a-Technician — Technician Dispatch & Booking Platform

University Capstone | 2024–2025

Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: **Project Manager & Full-Stack Developer** · Stack: Node.js, Express, MongoDB, JWT, React

- **As Project Manager**, led a 5-person team from initial client requirements through to a live production launch — coordinated technicians and team members, triaged issues by priority, and was the primary point of contact for a real external client throughout delivery.
- Built an 8-stage job workflow (Open → Assigned → Accepted → En Route → On Site → In Progress → Completed → Closed) with a full audit trail — directly analogous to triaging and tracking service issues by urgency, impact, and fault category.
- Built the internal operations dashboard used by staff to assign technicians and track job status in real time — practical experience coordinating field attendance and monitoring outcomes.
- Delivered a real product still in production use by a real business today — proof of reliable, accountable delivery.

TicketDesk — Help-Desk Ticketing Platform

Personal Project | 2025

Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk · Stack: Python, FastAPI, PostgreSQL, Docker

- Designed and built a help-desk system in Python covering the full incident lifecycle — log, prioritise, assign, resolve — with accurate, auto-generated documentation for every record.
- Wrote a 23-test automated suite to verify changes are safe before deployment — the same disciplined approach to testing and verification this role calls for following upgrades and configuration changes.

SkyOps — Infrastructure Monitoring Platform

Personal Project | 2025

Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops

- Built and personally operate a background health-check service polling system status every 60 seconds, identifying emerging issues and responding before they escalate — proactive monitoring on a live, deployed system.

WORK EXPERIENCE

Commercial Cleaner

Aug 2023 – Present

VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys through clear communication and reliable follow-up — the same customer service approach this role requires for depot operators and customers.

Warehouse Operator

Dec 2023 – Jan 2025

Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day in a fast-paced operational environment with manual handling, plus practical exposure to operational/mechanical processes relevant to depot facility settings.
- Identified and implemented a process improvement that cut picking time by 20% — proactive fault-finding and continuous improvement applied outside of software.

EDUCATION

Bachelor of Information Technology

Federation University Australia

Federation University Australia · Adelaide, SA

- Relevant units: Networking, Cybersecurity, Databases, Systems Analysis, Software Engineering, Python, Java.

CERTIFICATIONS

Google IT Support Professional Certificate
