SUMMARY

Recent graduate with a Bachelor of Information Technology, completed within the last 12 months, and two years of direct customer-facing experience. I'm drawn to Tanda's graduate program because it puts you in front of real customers from week one — that's exactly the kind of hands-on responsibility I want. As Project Manager on a university capstone, I led a 5-person team to deliver a live software platform for a real business client, managing the relationship directly from requirements through to launch. Because I built that software myself, I understand the customer side of SaaS in a way most graduates don't — I know what it's like to be the person someone calls when something isn't working, and what it takes to keep a client's trust through delivery. I'm curious, coachable, and genuinely excited about a long-term career in software, sales, or customer success.

PROJECTS — CUSTOMER DELIVERY IN PRACTICE

Call-a-Technician — Technician Dispatch & Booking Platform University Capstone | 2024–2025
Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: **Project Manager & Full-Stack Developer**

- **As Project Manager**, led a 5-person team from initial client requirements through to a live production launch — was the direct point of contact for a real business client, managing the relationship, expectations, and communication throughout.
- Gathered requirements, assessed business needs, and translated them into a working product the client actually needed — the same customer-understanding muscle this role is built around.
- Delivered a real product still in production use by a real business today — proof I can carry a customer relationship from first conversation through to a result they're happy with.

TicketDesk — Help-Desk Ticketing Platform Personal Project | 2025
Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk

- Designed and built a support platform from scratch on my own initiative — direct, practical understanding of what good customer support actually looks like from the inside.

SkyOps — Live Monitoring Platform Personal Project | 2025
Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops

- Built and personally operate a live system end-to-end — proof I learn fast and follow through, without needing to be shown every step.

WORK EXPERIENCE

Commercial Cleaner Aug 2023 – Present
VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys by listening to feedback and adjusting service to meet expectations.
- Introduced standardised checklists that improved site quality scores by 25% — proactive problem solving rather than waiting to be told.

Warehouse Operator Dec 2023 – Jan 2025
Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day in a fast-paced, high-volume environment, staying resilient under sustained pressure.
- Identified and implemented a process improvement that cut picking time by 20% on my own initiative.
