SUMMARY

Recent IT graduate with a Bachelor of Information Technology and a strong, genuine interest in networking, cyber security, and cloud technologies. I led a 5-person capstone team as Project Manager to deliver Call-a-Technician, a live booking platform now used in production by a real business — direct experience in customer delivery, requirements coordination, and managing a project from design through to a working solution. I have practical knowledge of networking fundamentals, Microsoft Azure, Microsoft 365, and security frameworks (NIST CSF 2.0, ASD Essential Eight) through both my degree and independent projects, including a live infrastructure monitoring platform I built and now personally operate. I'm self-motivated, detail-focused, customer-oriented, and genuinely excited to develop my skills under mentorship from experienced engineers. I have no plans for further formal study and am focused entirely on building my career in industry from here.

TECHNICAL SKILLS

Networking: LAN/WAN fundamentals, TCP/IP, DNS, DHCP, VPN, firewalls, network routing, subnetting, network diagnostics	Cyber Security: NIST CSF 2.0, ASD Essential Eight, vulnerability awareness, least-privilege access, incident response basics
Cloud & Infrastructure: Microsoft Azure, Azure AD / Entra ID, Microsoft 365 administration, AWS (EC2), Docker, Kubernetes	Infrastructure Support: Active Directory, Windows 10/11, Windows Server fundamentals, endpoint management, Intune
Automation & Monitoring: Terraform IaC, GitHub Actions CI/CD, Prometheus, Grafana, PowerShell, Bash	Development: Python, JavaScript, SQL (PostgreSQL/MySQL/SQLite), REST APIs, Git

CORE COMPETENCIES

Self-Motivated

Whatever-It-Takes Attitude

Customer-Focused

Attention to Detail

Analytical Problem Solving

Clear Communication

Team Collaboration

Fast Learner

PROJECTS

Call-a-Technician — Technician Dispatch & Booking Platform University Capstone | 2024–2025

Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: **Project Manager & Full-Stack Developer** · Stack: Node.js, Express, MongoDB, JWT, React, Azure-style cloud deployment

- As **Project Manager**, led a 5-person team from initial client requirements through to a live production launch — ran weekly standups, owned the sprint backlog in Agile/Scrum, coordinated across frontend, backend, and infrastructure workstreams, and was the primary point of contact for a real external client throughout delivery.
- Coordinated the full delivery lifecycle of a customer-facing solution: gathering requirements, assessing business needs, designing the architecture, and managing the team to deliver exactly what the client needed — direct experience with the customer delivery and coordination this role calls for.
- Designed and built a Node.js/Express/MongoDB REST API with JWT authentication and role-based access control, powering an 8-stage job workflow with a full audit trail.
- Built the public booking site and an internal operations dashboard end-to-end, including a customer request form, automated email confirmation, and reCAPTCHA spam protection.
- Delivered a real product still in production use by a real business today — proof of end-to-end ownership from requirements to a working, maintained solution.

SkyOps — Infrastructure, Monitoring & Security-Aware DevOps Platform Personal Project | 2025

Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops · Stack: Docker, Kubernetes, Helm, GitHub Actions, Prometheus, Grafana, FastAPI, PostgreSQL

- Designed and deployed a complete infrastructure pipeline covering containerisation, orchestration, CI/CD, and live cloud deployment — applying least-privilege access and structured configuration management throughout.
- Built and personally operate a background health-check service polling system status every 60 seconds, feeding a live monitoring dashboard for proactive issue detection — the same vulnerability/threat-monitoring mindset central to cyber security operations.
- Stood up a Grafana dashboard (request rate, P95 latency, error rate) for ongoing operational visibility, instrumented via Prometheus.

TicketDesk — Production REST API with Cloud Infrastructure

Personal Project | 2025

Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk · Stack: Python, FastAPI, PostgreSQL, Docker, Terraform (AWS EC2)

- Wrote Terraform infrastructure-as-code to provision AWS EC2 infrastructure with a security group and automated bootstrap script — repeatable, version-controlled infrastructure with security configuration built in from the start.
- Built a GitHub Actions CI pipeline running a 23-test automated suite on every push, catching issues before they reach production.

WORK EXPERIENCE

Commercial Cleaner

Aug 2023 – Present

VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys — a customer-focused mindset applied consistently outside of IT.

Warehouse Operator

Dec 2023 – Jan 2025

Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day, identifying and implementing a process improvement that cut picking time by 20% — analytical, detail-focused, self-driven.

EDUCATION

Bachelor of Information Technology

Federation University Australia

Federation University Australia · Adelaide, SA

- Relevant units: Networking, Cybersecurity, Databases, Systems Analysis, Software Engineering, Python, Java.
- Applied Agile/Scrum across all team projects; capstone delivered a live full-stack platform for a real client.

CERTIFICATIONS

Microsoft Azure AI Essentials

LinkedIn Learning · Feb 2025 – May 2025

Google IT Support Professional Certificate

Coursera / Google · Nov 2025 – Jan 2026

Career Essentials in Cybersecurity

Microsoft · Mar 2025 – May 2025

Generative AI Automation Specialization

Vanderbilt University · Apr 2025 – May 2025
