SUMMARY

IT graduate with a Bachelor of Information Technology, looking to apply strong troubleshooting and customer service skills to a technical support role. I want to be upfront: I don't yet have two years of paid technical support experience, and my background is in IT/software rather than electronics or automotive electrical systems specifically. What I do bring is a genuine, demonstrated ability to diagnose problems methodically, communicate technical solutions clearly to non-technical people, and maintain thorough case documentation — I've built and now personally operate a help-desk ticketing platform covering this exact workflow. As Project Manager on a university capstone, I led a 5-person team delivering a live platform for a real client, managing the relationship and resolving issues directly. I'm organised, detail-oriented, a fast learner with new technical domains, and genuinely enjoy the challenge of solving a complex problem for a customer.

TECHNICAL SKILLS

Troubleshooting & Diagnostics: Structured fault-finding, root-cause analysis, hardware/software diagnostics, logical process of elimination	Customer Support Tools: CRM/helpdesk software workflow logic, case management, MS Office, ticketing systems
Documentation: Case documentation, knowledge base development, technical writing for non-technical audiences	IT & Systems: Networking fundamentals (TCP/IP, DNS, DHCP), Windows/Linux, REST APIs, basic electronics-adjacent system design
Quality & Testing: Automated testing, structured verification before release, change management	Cloud & Automation: AWS, Docker, monitoring (Prometheus, Grafana), GitHub Actions CI/CD

CORE COMPETENCIES

Customer Service

Clear Technical Communication

Organised & Detail-Oriented

Independent & Team Work

PROJECTS

Call-a-Technician — Technician Dispatch & Booking Platform University Capstone | 2024–2025
Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: **Project Manager & Full-Stack Developer**

- As **Project Manager**, led a 5-person team from initial client requirements through to a live production launch — was the direct point of contact for a real external client, resolving issues and managing the relationship throughout delivery.
- Built an 8-stage job workflow with a full audit trail and maintained accurate case-level documentation across the project — the same case-documentation discipline this role requires.
- Delivered a real product still in production use by a real business today — proof of reliable, accountable follow-through.

TicketDesk — Help-Desk Case Management Platform Personal Project | 2025
Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk

- Designed and built a support case management system covering the full lifecycle — log, prioritise, troubleshoot, resolve, document — directly mirroring this role's Tier 2 case management responsibilities.
- Wrote a 23-test automated suite and maintained auto-generated knowledge base documentation, applying the same continuous-improvement mindset this role requires for knowledge base development.

SkyOps — Infrastructure Monitoring Platform Personal Project | 2025
Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops

- Built and personally operate a live monitoring system, diagnosing and resolving issues independently as they're detected.

WORK EXPERIENCE

Commercial Cleaner Aug 2023 – Present
VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys through clear communication and reliable, outcome-focused service.

Warehouse Operator

Dec 2023 – Jan 2025

Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day in a fast-paced environment, with zero lost-time incidents and full WHS compliance.
