Dear Karina,

I'm writing to apply for the Junior IT Support Officer role with Paxus. I'm currently based in Adelaide and open to relocating to Sydney for the right opportunity — and a genuinely entry-level role with hands-on mentorship from experienced engineers is exactly the start I'm looking for in my IT career.

I hold a Bachelor of Information Technology and a Google IT Support Professional Certificate, giving me a solid foundation in IT systems, networking, and troubleshooting principles. Beyond study, I built **TicketDesk** (ticketdesk-app.onrender.com), a help-desk platform I designed myself around the exact incident lifecycle this role works in every day — logging, prioritising, assigning, and resolving through to closure, with accurate documentation the whole way. I also built and personally operate **SkyOps**, a monitoring platform where I follow a structured troubleshooting process to detect and respond to issues independently.

As Project Manager on a university capstone project, **Call-a-Technician** (callatechnician.com.au), I was the primary point of contact for a real external client throughout delivery — clear, friendly communication, keeping them informed, and managing the relationship through to a successful live launch. That experience taught me how much client trust depends on being clear, responsive, and easy to deal with, which I understand is central to this role.

I'm an organised, detail-focused communicator who genuinely enjoys solving problems, and I'm comfortable working both independently and as part of a team. I'm excited about the opportunity to learn from your team's experienced staff and grow into a capable, reliable support technician.

Thank you for considering my application — I'd welcome the chance to discuss this further.

Kind regards,

Priyanshu
