SUMMARY

IT professional with a Bachelor of IT from Federation University Australia, with hands-on experience in Microsoft Azure, Azure AD/Entra ID, Microsoft 365 administration, and cloud platform monitoring. I've built and now maintain three production systems where platform stability, proactive monitoring, and automation aren't theoretical — I run a live health-check service that polls system status every 60 seconds and a Prometheus/Grafana stack tracking uptime, latency, and error rates in real time. I write PowerShell and Bash for automation and infrastructure tasks, have practical SQL experience across PostgreSQL, MySQL, and SQLite (schema design, query tuning, backup-and-restore patterns), and maintain clear, current technical documentation as standard practice. Comfortable working in a small, collaborative team and communicating clearly across technical and non-technical stakeholders.

TECHNICAL SKILLS

Microsoft Cloud & Identity: Microsoft Azure, Azure AD / Entra ID, Microsoft 365 administration, Exchange Online, Intune, MFA, RBAC, conditional access

Automation & Scripting: PowerShell, Bash, Git, Terraform IaC, GitHub Actions CI/CD

Monitoring & Security: Prometheus, Grafana, proactive health-check services, vulnerability awareness (NIST CSF 2.0, ASD Essential Eight), least-privilege access

Systems Administration: Windows 10/11, Windows Server fundamentals, Linux (Ubuntu), Active Directory, endpoint management

Database Administration: SQL (PostgreSQL, MySQL, SQLite) — schema design, query optimisation, backup/restore patterns, environment-based config separation

Cloud & Platform Operations: AWS (EC2), Docker, Kubernetes, uptime monitoring, incident documentation, networking fundamentals (TCP/IP, DNS, DHCP, VPN, firewalls)

CORE COMPETENCIES

Proactive Monitoring Mindset

Continuous Improvement

Clear Communication

Documentation Discipline

Team Collaboration

Problem Solving

Reliability & Follow-Through

Fast Learner

PROJECTS

SkyOps — Platform Monitoring & DevOps Pipeline

Personal Project | 2025

Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops

- Built a background health-check service that polls registered endpoints every 60 seconds, feeding a live dashboard showing real-time uptime history, latency trends, and status breakdown — direct experience with the proactive monitoring this role requires to maximise uptime.
- Stood up a Grafana dashboard (request rate, P95 latency, error rate, HTTP status breakdown) auto-provisioned via Kubernetes ConfigMap, instrumented with Prometheus metrics — practical security and performance visibility, not just theory.
- Built a GitHub Actions CI/CD pipeline that lints, tests, builds, and deploys automatically on every commit — applying automation to reduce manual risk and keep the platform continuously improving.
- Wrote Terraform/Helm infrastructure-as-code and maintained accurate, current documentation for setup, deployment, and troubleshooting throughout.

TicketDesk — Production REST API with Database Administration

Personal Project | 2025

Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk

- Designed the relational database schema and implemented a config pattern that switches between SQLite (test) and PostgreSQL (production) via a single environment variable — practical experience separating environments cleanly, a key SQL administration skill.
- Wrote a 23-test automated suite with isolated per-test databases to catch regressions before they reach production, reflecting a "constant improvement reduces risk" mindset.
- Provisioned AWS EC2 infrastructure with Terraform, including an automated bootstrap script and security group configuration — practical security-conscious infrastructure setup.

- Instrumented the API with Prometheus and Grafana for ongoing performance and error-rate visibility.

Call-a-Technician — Full-Stack Platform & Team Delivery

University Capstone | 2024–2025

Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician

- Led a 5-person team as Project Manager, communicating clearly with a real external client and the development team to keep delivery aligned with business needs — directly relevant to engaging positively with teams to deliver outcomes for clients.
- Built and maintained role-based access control (JWT authentication) and a full audit trail across an 8-stage job workflow, with documentation kept current throughout the project.

WORK EXPERIENCE

Warehouse Operator

Dec 2023 – Jan 2025

Electrolux Home Products · Adelaide, SA

- Identified and implemented a process improvement that cut picking time by 20% — a continuous-improvement mindset applied outside of software.
- Ran cycle counts and reconciliation that reduced stock variances by 30% over two quarters through structured tracking and documentation.

Commercial Cleaner

Aug 2023 – Present

VIP Cleaning Services · Adelaide, SA

- Consistently scored 95% in client quality surveys; introduced standardised checklists that improved site scores by 25% — proactive process improvement and clear client communication.

EDUCATION

Bachelor of Information Technology

Federation University Australia

Federation University Australia · Adelaide, SA

- Relevant units: Networking, Cybersecurity, Databases, Systems Analysis, Software Engineering, Python, Java.

CERTIFICATIONS

Microsoft Azure AI Essentials

LinkedIn Learning · Feb 2025 – May 2025

Google IT Support Professional Certificate

Coursera / Google · Nov 2025 – Jan 2026

Career Essentials in Cybersecurity

Microsoft · Mar 2025 – May 2025

Generative AI Automation Specialization

Vanderbilt University · Apr 2025 – May 2025
