SUMMARY

Recent Software Engineering / IT graduate with a genuine engineering mindset — I approach problems analytically, build solutions systematically, and take full ownership of outcomes. Over the past year I've designed, built, and deployed three live production systems end-to-end, applying the same disciplined, specification-driven approach that engineering work demands: defining requirements precisely, building to those specifications, testing rigorously, and documenting thoroughly. As Project Manager on a real client project, I contributed to project delivery, planning, coordination, and stakeholder management — translating client requirements into a working system through structured delivery, exactly the kind of analytical and delivery-focused work KPMG's Engineering teams support on large-scale infrastructure and government projects. I'm curious, collaborative, and practical — I want to apply my analytical capability to real problems that have genuine impact across communities.

TECHNICAL SKILLS

- Data & Analytics:** SQL (PostgreSQL/MySQL/SQLite), relational schema design, data integration via REST APIs, live performance dashboards (Prometheus, Grafana)
- Software Engineering:** Python (FastAPI), Node.js, JavaScript, React, automated testing (23-test suite), Git, structured documentation
- Technical Analysis:** Systems analysis, process mapping and improvement, performance monitoring, root-cause analysis, structured problem solving
- Project & Delivery:** Agile/Scrum project management, requirements gathering, planning and scheduling, stakeholder communication, risk identification
- Systems & Infrastructure:** Cloud systems (AWS, Azure), infrastructure-as-code (Terraform), containerisation (Docker, Kubernetes), CI/CD automation
- Documentation & Reporting:** Technical specifications, user guides, API documentation (OpenAPI/Swagger), clear reporting for varied audiences

CORE COMPETENCIES

- Analytical Thinking
- Practical Problem Solving
- Project Delivery
- Stakeholder Communication
- Systems Thinking
- Collaborative
- Curiosity
- Attention to Detail

PROJECTS

Call-a-Technician — Technician Dispatch & Booking Platform University Capstone | 2024–2025
Live: callatechnician.com.au · GitHub: github.com/Priyanshukainwal0/call-a-technician · Role: **Project Manager & Full-Stack Developer**

- As **Project Manager**, led a 5-person team through the full project delivery lifecycle — requirements gathering and analysis, technical planning, Agile/Scrum delivery management, and stakeholder coordination with a real external client throughout.
- Contributed to project scheduling, risk identification, and quality assurance across the build, ensuring delivery met the client's requirements and the system was reliable from day one.
- Delivered a real product still in production use by a real business today — directly experiencing how structured project delivery translates into real-world outcomes for clients.

SkyOps — Infrastructure Systems & Performance Monitoring Personal Project | 2025
Live: skyops-api-8dn9.onrender.com · GitHub: github.com/Priyanshukainwal0/skyops

- Designed and built a live infrastructure monitoring system that tracks system health, performance metrics, and operational data in real time — applying the same performance analysis and risk visibility mindset engineering teams use on large asset and infrastructure projects.
- Built and operated the full system lifecycle from design through deployment, testing, and ongoing maintenance — end-to-end engineering responsibility on a real, live system.

TicketDesk — Production System with Automated Testing Personal Project | 2025
Live: ticketdesk-app.onrender.com · GitHub: github.com/Priyanshukainwal0/ticketdesk

- Designed, built, and tested a production system with a 23-test automated suite and Terraform-provisioned cloud infrastructure — applying rigorous, specification-driven engineering quality standards independently.

WORK EXPERIENCE

Warehouse Operator

Electrolux Home Products · Adelaide, SA

- Maintained 99.5% accuracy across 200–300 orders per day in a fast-paced operational environment; identified and implemented a process improvement that cut picking time by 20% — practical, analytical problem-solving applied to real operational challenges.

Commercial Cleaner

Aug 2023 – Present

VIP Cleaning Services · Adelaide, SA

- Worked directly with clients on a recurring basis, consistently scoring 95% in client quality surveys; introduced standardised checklists that improved site quality scores by 25%.

EDUCATION

Bachelor of Information Technology

Federation University Australia

Federation University Australia · Adelaide, SA

- Relevant units: Python, Java, Databases, Networking, Cybersecurity, Software Engineering, Systems Analysis.

CERTIFICATIONS

Microsoft Azure AI Essentials

LinkedIn Learning · Feb 2025 – May 2025

Google IT Support Professional Certificate

Coursera / Google · Nov 2025 – Jan 2026

Generative AI Automation Specialization

Vanderbilt University · Apr 2025 – May 2025

Career Essentials in Cybersecurity

Microsoft · Mar 2025 – May 2025
