Dear Hiring Manager,

I'm writing to apply for the IT Service Desk Analyst role at Stratco. "When technology works, nobody notices" is exactly the mindset I bring to IT support — I want to be the person who quietly makes someone's day easier, not just someone who logs a ticket and moves on.

I hold a Bachelor of Information Technology and a Google IT Support Professional Certificate, with practical experience configuring and supporting Microsoft 365, Active Directory, and Windows desktop/server environments. As Project Manager on a university capstone, I led a 5-person team to deliver **Call-a-Technician** (callatechnician.com.au), a live booking platform now used in production by a real business — I was the direct point of contact for that client throughout delivery, which taught me firsthand what it takes to build and maintain a professional working relationship while solving real problems.

I've also built and now personally operate **TicketDesk** (ticketdesk-app.onrender.com), a help-desk platform modelling the exact incident lifecycle — log, prioritise, assign, resolve — that this role works in daily, with documentation and change-management thinking built in from the start. My second project, **SkyOps**, has me personally monitoring a live system and responding to issues independently, which is the same proactive, "catch it before it escalates" approach I'd bring to supporting Stratco's national and international sites.

I'm a genuine "can do" person — I communicate clearly, stay calm when something's frustrating for the user on the other end, and take pride in turning a problem into a positive outcome. I'd welcome the opportunity to bring that mindset to your team.

Thank you for considering my application.

Kind regards,

Priyanshu
