Dear Hiring Manager,

I'm writing to apply for the Graduate IT Support Officer role at IDEC Solutions. I'm currently based in Adelaide and open to relocating to Brisbane — a role that combines genuine day-to-day IT support with real exposure to AI tools and business technology is exactly the kind of opportunity I've been hoping to find.

I hold a Bachelor of Information Technology and a Google IT Support Professional Certificate, with practical knowledge of Microsoft Windows, Microsoft 365, Active Directory, and PowerShell scripting. What I think sets me apart for this specific role is that I've gone out of my way to build genuine depth in AI — I hold a Microsoft Azure AI Essentials certificate and a Generative AI Automation Specialization from Vanderbilt University, so when you mention researching and evaluating emerging AI tools, that's not a cold start for me, it's something I've already been doing on my own.

As Project Manager on a university capstone, I led a 5-person team to deliver Call-a-Technician (callatechnician.com.au), a live booking platform now used in production by a real business — I coordinated people, managed timelines, kept documentation current, and solved problems independently throughout. I've also built and now personally operate two more live systems, TicketDesk (ticketdesk-app.onrender.com) and SkyOps (skyops-api-8dn9.onrender.com), which gave me real, hands-on practice with the kind of coordination and follow-up your role describes when liaising with your external MSP.

I'm curious, organised, and genuinely enjoy helping people solve technical problems. I'd love the opportunity to bring that, along with my interest in AI, to a growing business like IDEC Solutions.

Thank you for considering my application.

Kind regards,

Priyanshu
